## DRAWINGS 924502

## FEATURES:

- Spheroidal graphite cast iron channel and grate EN-GJS-500-7;
- Fixing the grid to the channel with bolt and screw;
- Cast iron frame for maximum protection;
- "V" channel that maximizes hydraulic capacity and self-cleaning.
- Load class D400 according to EN 1433.

## INSTALLATION LOCATION:

Ductile cast iron channel, Vline model, for collection of rainwater. Multipurpose use channels with optimized "V" section, with self-cleaning effect, designed for situations of absence of longitudinal slope. Side cast iron frames for maximum protection and bolt and screw fastening system. Ideal for application in heavy traffic zones.
